In Fig. 19, a non-release zone 226 around three sides of the upper

On page 40, line 2 has been amended and now reads as:

Asynthetic, clear or opaque and can have patterned or full release coating.

On page 40, line 23 has been amended and now reads as follows:

Imany objectives, including the basic objective of providing a process

In the claims, please cancel claims 17-40, 44 and 50-58.

HAN

In the claims, claims 1, 11 and 12 have been amended and now read as follows:

In a process for making a multiple-layer label, the steps of:
 providing hold-down openings in a first web defining an upper label layer;
 combining said first web with a second web which second web defines a base label layer; and

applying an adhesive overlaminate to said first web, said overlaminate extending over and through said hold-down openings in said first web and securing said first and second webs together.
